

Reverse Engineering Censorship in China: A Data Science Approach

PDEL Innovation Workshop

with **Molly Roberts**
Assistant Professor of
Political Science,
UC San Diego

and **Amarnath Gupta**,
Research Scientist at the
San Diego Supercomputer
Center (SDSC),
UC San Diego

Jan. 27
4–6 p.m.

San Diego
Supercomputer
Center Auditorium

The Chinese government's censorship program constitutes one of the most extensive efforts to selectively censor human communication in recorded history. In this talk, Roberts and Gupta will provide an overview of current and past projects on censorship, including a data science approach to measuring censorship in China.
